

FIVE FLUENT FACTS

$348 + 90 = 438$
 $9 \times 12 = 108$
 $90 \times 6 = 540$
 $440 + 260 = 700$
 $50 - 37 = 13$

PROCEDURAL PRACTICE

1) 40, 47, 54, 61, 68

61, 68

2) I am a 3d shape. I have 3 faces. One face is curved and the other two are flat circles. What am I called?

Cylinder

3) 240, 234, 228, 222, 216

228, 216

4) $9703 - 746 =$

8957

5) $400 + \underline{\quad} = 1755$

1355

6) One fifth of 250 =

50

BRAIN TEASER

I think of a number.
I double it.
I take away 50.
I am left with 350.
What number did I start with?
