

FIVE FLUENT FACTS

$348 + 90 =$

$9 \times 12 =$

$90 \times 6 =$

$440 + \underline{\quad} = 700$

$50 - \underline{\quad} = 13$

PROCEDURAL PRACTICE

1) 40, 47, 54, , ,

2) I am a 3d shape. I have 3 faces. One face is curved and the other two are flat circles. What am I called?

3) 240, 234, , 222,

$4) 9703 - 746 =$

$5) 400 + \underline{\quad} = 1755$

$6) \text{One fifth of } 250 =$

BRAIN TEASER

I think of a number.
I double it.
I take away 50.
I am left with 350.
What number did I start with?
